UNIVERSITY

BUILDING A STATE OF POSSIBILITY

Kansas State University is embarking on a bold new initiative to leverage 150-plus years of excellence to create thousands of new jobs and capture billions of dollars in new outside investment for Kansas.

K-State's plan for economic prosperity will build on university talent and specialized assets to create **3,000 jobs** and **\$3 billion** in direct investment in Kansas by 2029.

Find K-State's full plan for economic prosperity in Kansas, short-term progress updates and a benchmark dashboard, at k-state.edu/economic-prosperity.

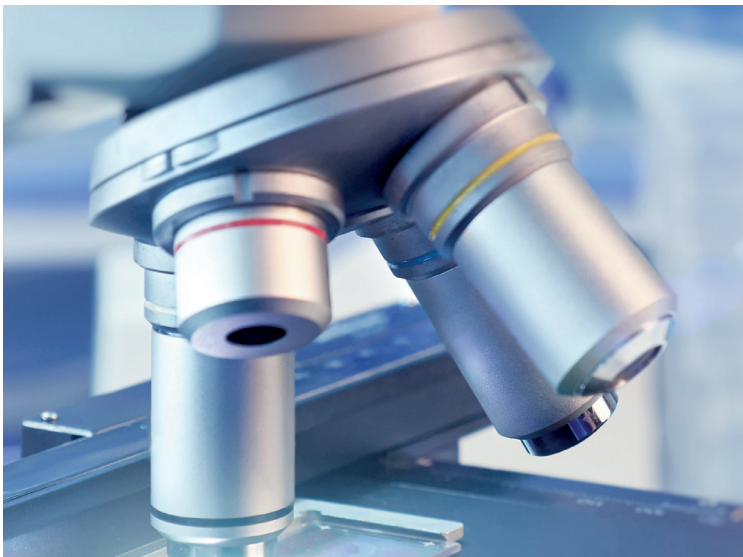

Food and agriculture systems innovation

K-State will work with producers to transform, sustain and adapt food and agriculture systems to create jobs and bring investments to Kansas.

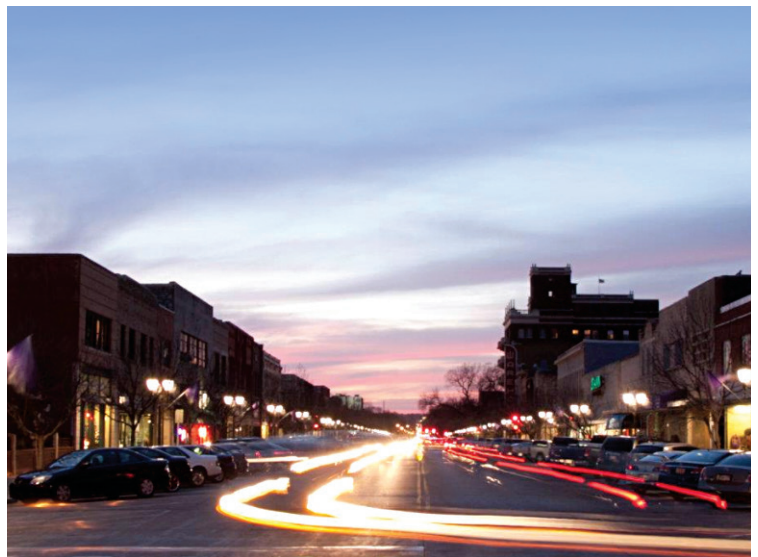

Digital agriculture and advanced analytics

K-State will lead the global food system through methods based on data, analytics and decision-making.

Biosecurity and biodefense

K-State will become the foremost U.S. resource for private-public research collaboration on pathogens of global significance, biosecurity and biodefense.

K-State 105: Every Town to Gown

K-State will provide businesses and communities with access to university innovation, talent and training.
